PROFILE

Experienced Java Developer with a strong background in software development and a bachelor's degree in computer engineering. I have been working as a Java Developer at Capgemini India, where I have gained expertise in Java, PSQL, Spring Boot, PgAdmin, Postman, React. I am skilled in developing and maintaining software applications, ensuring their functionality and efficiency. With a solid understanding of software development principles and the ability to work effectively in a team, I have successfully contributed to the development of high-quality software solutions. I am seeking a challenging role as a Java Developer to further enhance my skills and contribute to the success of a dynamic organization.

Bachelor of Technology (Computer Engineering)

Shri Shivaji Vidya Prasarak Sanstha's Bapusaheb Shivajirao Deore College of Engineering, Dhule (MS).

Dr. Babasaheb Ambedkar Technological University

Sept 2017-June2021

TRAINING AND SEMINARS

JEE Full Stack 2.0 with React

Membership Inference Attacks against Machine Learning Models.

CERTIFICATION COMPLETED BY AWS

- ❖ AWS Certified Cloud Practitioner
- ❖ AWS Certified Solutions Architect – Associate

ONGOING NEW TECHNOLOGY COURSES

Ethans S-Tech, Wakad, Pune

- ❖ AWS
- ❖ DevOps

PROFESSIONAL WORK EXPERIENCE

Capgemini India PVT Ltd

Analyst/ Software Engineer

December 2021-Current/ Pune/MH

Project During Spring Boot Training:

1. Online Corona Consultation System (Room Management System)

Full Stack Developer

Online Corona Consultation System is an e-commerce-base web application.

where the user can view the Room related to information and can buy the Room online. Admin or patient can add the Room according to the Room category or Room type. This project contains all the common features of a web application like CRUD operation ADD product, delete product, Edit, and Update Product.

An Online Corona Consultation System is using React to manage the view part or User part of the application also It's using servlets to manage the server-side request and response and PostgreSQL/MySQL to manage the backend. Technologies Used: -

- • Spring Boot- To Develop Backend.
- • PostgreSQL- Used to develop DB.
- • React – To Develop Frontend.
- • postman – To Use for testing.

2. ETAP (Genx) Project (Backend Developer)

a. In Genx, I was working as Backend Developer, I have good Knowledge about Java, Postman, pgAdmin and STS. And I also part of Remote Deployment.

b. I am also working in Azure DevOps platform means how to trigger and Build the Pipeline

c. I am also good in Solving STS / Maven Problems.

3. Forecasting app (Backend Developer):

a. Forecast app is an Internal Project, I am a Java Developer, and I have been working on that project for 6 months.

b. In the Forecast app, I am used STS and PgAdmin4 Tool.

Environment: Technical Details - Intel Core I5, Windows 10, eclipse, Visual Studio, Java, Spring Boot, React.

CERTIFICATION COMPLETED BY COURSERA

Coursera Java Programming: Solving Problems with Software:

Coursera Career planning resume CV:

Coursera Communication Strategies for a Virtual Age:

Coursera Database Design and Basic SQL in PostgreSQL:

Coursera Foundations of Project Management:

Coursera Intermediate PostgreSQL:

Coursera Introduction to Java:

Coursera JSON and Natural Language Processing in PostgreSQL:

Coursera Spring - Ecosystem and Core:

Coursera Successful Presentation:
Agile Software Development:
Project Execution: Running the Project:
